Professional Summary

Software Engineering undergraduate skilled in Java and Python backend development, with hands-on experience building AI-integrated microservices (FastAPI, LangChain, PostGIS) and developing 10+ full-stack applications, including shipping 3 live production platforms for clients. Seeking a Software Engineer Internship to apply strong backend architecture, problem-solving, and AI engineering skills within a fast-paced engineering team.

Technical Skills

Languages: Java, Python, PHP, JavaScript, SQL, GO

Frameworks: Spring Boot, FastAPI, LangChain, Django, Laravel, Node.js/Express, Tailwind CSS, Blade

Databases: PostgreSQL (PostGIS), MySQL, MariaDB, SQLite, Firebase, Supabase

Tools & Platforms: Git, GitHub, Docker, Apache Kafka, REST APIs, Redis, PHPUnit, Linux, cPanel, DNS Configuration

Soft Skills: Problem-Solving, Client Communication, End-to-End Project Delivery, Adaptability, Mentorship

Professional Experience

Backend Developer - Freelance / Self-Employed, Sri Lanka

Oct 2025 - Oct 2026

- Delivered 3 production-grade platforms for independent clients (ivy.lk, vfix.lk, mamcargo.com), managing the full development lifecycle from scoping to deployment.
- Architected backend systems and role-based access control; handled domain purchase, DNS configuration, and secure deployment across 3 live production systems.
- Replaced manual, paper-based business workflows with automated booking, order, and logistics platforms for real clients.

Banking Trainee - People's Bank, Chenkalady

Feb 2024 - Jun 2024

- Assisted 80+ customers daily, maintained financial records with 100% accuracy, and enforced KYC/AML compliance while mentoring 5 new trainees.

Software Engineering Projects

Completed 10+ software projects to date - the following are the most relevant to this application.

ResQAI - AI-Powered Disaster & Emergency Relief Platform

July 2026 - Oct 2026

github.com/dinathsv/resqai-platform

- Built the Python FastAPI AI microservice powering LLM-driven situational summaries, multilingual report translation, and a trilingual first-aid chatbot.
- Designed the PostGIS geospatial database schema (spatial indexes, triggers, nearest-hospital function) and implemented the resource-locator service.
- Scaffolded the Node.js/Express backend and configured Docker Compose infrastructure for PostGIS and Redis.
- Tech:** Python, FastAPI, Node.js, Express, React Native, PostgreSQL/PostGIS, Redis, Docker, LLM Integration.

CORE - Centralized Operations & Routing Engine (AI-Augmented Supply Chain Platform) Aug 2026 - Present

github.com/dinathsv/CORE

- Designing an AI-augmented supply chain platform that embeds a conversational AI agent ("Assist") directly into the operational layer of a microservices system.
- Architected an API gateway (Spring Cloud Gateway) governing traffic, authentication, and rate limiting across independently deployed Inventory, Orders, and Supplier microservices (Java, Spring Boot) connected via Apache Kafka event-driven messaging.
- Built a Python/FastAPI demand-forecasting service and integrated LangChain-based retrieval-augmented generation (RAG), letting operators query live gateway logs, inventory data, and forecasts in natural language.
- Tech:** Java, Spring Boot, Spring Cloud Gateway, Apache Kafka, Python, FastAPI, LangChain, RAG.

Multi-Client Laravel Platforms - E-Commerce, Booking & Logistics Systems

Dec 2025 - May 2026

ivy.lk | vfix.lk | mamcargo.com [3 live production platforms for clients]

- Independently designed, built, and deployed 3 production Laravel platforms for separate clients: an e-commerce order management system (ivy.lk), a service-booking & workforce management platform (vfix.lk), and a dual-brand logistics & export platform (mamcargo.com).
- Implemented role-based access control, state-driven business logic, and admin dashboards across all three systems, including dynamic pricing, SMS notifications, and automated PDF invoicing (DomPDF).
- Managed the full deployment lifecycle for each system - domain purchase, DNS configuration, and production hosting on cPanel.
- Tech:** Laravel 12, PHP 8.2, MySQL/MariaDB, Blade, Alpine.js, Tailwind CSS, Vite, PHPUnit.

Education

National Diploma in IT (NDT) - ITUM, University of Moratuwa

Feb 2025 - Feb 2028

Bachelor of IT (BIT), External - University of Moratuwa

Mar 2024 - Mar 2027

Diploma in IT & English (Merit) - ESOF Metro Campus

2022 - 2023

Certifications

AI/ML Engineer Certification (Stages 1-3) - SLIIT | Fundamentals of Java Programming (Coursera) | Java Intermediate Course (Sololearn) | Prompt Design in Vertex AI Skill Badge (Google Cloud)
