Professional Summary

Software Engineering undergraduate skilled in Java and Python backend development, with hands-on experience deploying, supporting, and troubleshooting 3 live production platforms and building AI-integrated microservices (Spring Boot, Kafka, FastAPI). Seeking a Software Engineering Internship to apply Java, API gateway, microservices, and OAuth2 / JWT security skills to building reliable, secure API platforms. Available for a 1-year internship from January 2027.

Technical Skills

Languages: Java, Python, Go, Ballerina, JavaScript, SQL, PHP
APIs & Architecture: REST APIs, API Gateway, Microservices, Event-Driven Architecture, Apache Kafka, OAuth2 / JWT, RBAC, Rate Limiting
Backend & Frameworks: Spring Boot, Spring Cloud Gateway, FastAPI, SQLAlchemy, Django, Node.js/Express, Laravel
DevOps & Operations: Linux, Bash, Docker, Kubernetes, Docker Compose, Git, GitHub, Production Support, Troubleshooting, Log Analysis, DNS, Pytest
Databases: PostgreSQL (PostGIS), MySQL, MariaDB, Redis, ChromaDB (Vector Database)
AI & Machine Learning: Scikit-Learn, Random Forest, Google Vertex AI / Gemini, LLM Integration, RAG, LangChain, Prompt Engineering
Frontend & Mobile: React, Next.js, React Native, Tailwind CSS

Professional Experience

Backend Developer - Freelance / Self-Employed, Sri Lanka — Oct 2025 - Oct 2026

- Owned and supported 3 live production platforms (ivy.lk, vfix.lk, mamcargo.com) from deployment through handover to client administrators; troubleshot production issues via application logs and database behavior and documented admin procedures.
- Architected backend systems and role-based access control; handled domain purchase, DNS configuration, and secure deployment across 3 live production systems.
- Automated manual, paper-based workflows via booking, order, and logistics platforms, cutting repetitive work for real clients.

Banking Trainee - People's Bank, Chenkalady — Feb 2024 - Jun 2024

- Resolved 80+ customer queries daily with 100% record accuracy; enforced KYC/AML compliance and mentored 5 new trainees.

Projects

CORE - Centralized Operations & Routing Engine (AI-Augmented Supply Chain Platform) — Aug 2026 - Present
github.com/dinathsv/CORE

- Building an AI-augmented supply chain platform with an embedded conversational agent ("Assist") in a Java microservices system.
- Architected a Spring Cloud Gateway API gateway handling authentication, rate limiting, and traffic routing across Inventory, Orders, and Supplier Spring Boot microservices, connected via Apache Kafka event-driven messaging.
- Built a LangChain RAG pipeline so operators can query gateway logs, inventory, and forecasts in natural language for faster log analysis and root-cause investigation, alongside a FastAPI demand-forecasting service.
- **Tech:** Java, Spring Boot, Spring Cloud Gateway, Apache Kafka, Python, FastAPI, LangChain, RAG.

ResQAI - AI-Powered Disaster & Emergency Relief Platform — Jul 2026 - Oct 2026
github.com/dinathsv/resqai-platform

- Built Random Forest flood and risk prediction models (flood classifier 99.46% accuracy; risk regressor MAE 0.10, R^2 0.9981) on 30 years of data across 25 districts, served via FastAPI with NBRO rainfall alert thresholds.
- Architected async FastAPI + SQLAlchemy + PostGIS services with GiST/KNN indexing for sub-second nearest-hospital routing; implemented JWT/RBAC auth with Redis OTP rate-limiting and Sri Lankan NIC validation.
- Developed a trilingual (Sinhala, Tamil, English) Vertex AI service for crisis report extraction and 1990 Suwa Seriya triage dispatch.
- **Tech:** Python, FastAPI, Scikit-Learn, SQLAlchemy, PostgreSQL/PostGIS, Redis, Google Vertex AI, Docker, React Native.

Multi-Client Laravel Platforms - E-Commerce, Booking & Logistics Systems — Dec 2025 - May 2026
ivy.lk | vfix.lk | mamcargo.com [3 live production platforms for clients]

- Designed, built, and deployed 3 production Laravel platforms for clients: e-commerce order management (ivy.lk), service booking & workforce management (vfix.lk), and logistics & export (mamcargo.com).
- Implemented RBAC, state-driven business logic, and admin dashboards, including dynamic pricing, SMS notifications, and automated PDF invoicing (DomPDF).
- Handled deployment and production support for each system: domain, DNS hosting, and troubleshooting.
- **Tech:** Laravel 12, PHP 8.2, MySQL/MariaDB, Blade, Alpine.js, Tailwind CSS, Vite, PHPUnit.

Education

National Diploma in IT (NDT) - ITUM, University of Moratuwa — Feb 2025 - Feb 2028
Bachelor of IT (BIT), External - University of Moratuwa — Mar 2024 - Mar 2027
Diploma in IT & English (Merit) - ESOFT Metro Campus — 2022 - 2023

Certifications & Awards

Agent Control and Management: Foundations, WSO2 | AI/ML Engineer (Stages 1 to 3) - SLIIT | Prompt Design in Vertex AI Skill Badge (Google Cloud)
1st Place - Best Poster Award (Information Technology) - 5th Int. Research Conf. of ITUM (ITUMIRC 2026) Nov 2026
